

MySQL的简单查询语句

查询

一:查询所有数据

select from Info查所有数据

select Code, Name from Info查特定列

二:根据条件查

select from Info where Code='p001'一个条件查询

select from Info where Code='p01' and Nation='n001'多条件并关系查询
select from Info where Name='胡军' or Nation='n001'多条件或关系查询

select* from Car where Price>=50 and Price<=60范围查询

select from Car where Price between 50 and 60范围查询

三:模糊查询

select * from Car where Name like '%型%'通配符代表任意多个字符

select from Car where Name like '%奥迪%' 通配符代表任意一个字符

select * from Car where Name like so/

四:排序

select* from Car order by Price asc按照价格升序排列

select from Car order by Price desc按照价格降序排列

select * from Car order by Price, il按照两列进行排序,前面的为主要的

五:统计函数(聚合函数)

select count(Code) from Car查询表中有多少条数据

select max(Price) from Car取价格的最大值

select min(Price) from Car取价格的最小值

select sum(Price) from Car取价格的总和

select avg(Price) from Car取价格的平均值

六:分组查询

select Brand from Car group by Brand having count(*)>2查询所有系列中数量大于2的

七:分页查询

select from Car limit 0,5跳过几条数据取几条数据

八:去重查询

select distinct Brand from Car
